

## Data Sheet

# Profi-Max , our highest-performing flotation wheel ever.

With the need for tractors and trailers to carry ever-greater loads and work for long hours, today's heavy-duty trailers require high performance wheels; Profi-Max provides the ideal solution for challenging applications and the next generation of tyres.

### Profi-Max wheel is the next generation offering for flotation wheels in the field

Developed and tested to provide higher load capacity, higher operating speeds and longer life, Profi-Max is the next generation offering for flotation wheels in the field and delivers a number of operational and performance advantages:

- New loading capacities.
- Improved manufacturing and welding processes for higher load discs and to ensure the highest quality.
- Provide greater tyre protection and in-field stability.
- Designed and tested to handle heavier loads and higher speeds – now available up to 80 km/h and high spot marked.
- Also available on request for speeds up to 100 km/h.
- Optimized for CT/VF tyres, with a wider bead seat.
- Longer Warranty – Now 5 year.

### Highlights

- Higher load capacity + 20% in comparison with the previous.
- Lightest wheel in the market.
- C5 classification paint system, suitable for aggressive environments, providing salt spray test up to >1400h.
- Wide flange design offers protection for advanced tyre technology.
- Available with valve guards.
- Optional – Connection to Central Tyre Inflation System (CTIS).

# Profi-Max

moveero

Profi-Max meets the very specific requirements of heavy duty, high load-bearing flotation tyres, which may be subject to sustained periods of intensive use, and have been developed to provide increased load capacity, higher operating speeds and longer life.

With a wider bead area and symmetrical rim, the Profi-Max from moveero offers an increase in fatigue life and loading capacity to meet the strongest tyres in the market.
