

Vacancy – Maintenance Technician

Role Purpose

moveero Ltd is about evolving every day - our wheel manufacturing, products & services for off-highway industries. With a history that dates back to 1908, we are proud of our heritage and continue to have the drive and determination to maintain our leading position in the markets we operate in - and our people play a large role in this.

Our business was built by passionate and committed people and now

moveero Ltd, based in Telford, are looking to recruit a Maintenance Technician to join their team in a fast paced, primarily off-highway wheel and automotive manufacturing environment.

To support the production process and manufacturing team at the Telford Site through breakdown repairs and PM's. To contribute to continuous improvement by identifying and minimising root cause issues and raising safety concerns

Key Responsibilities

Responsibilities will include but not be limited to:

- To prioritise, generate and promote safe working practices and adherence to Health and Safety standards at all times.
- Maintain adherence to PPE standards
- To provide effective maintenance support to assigned area by responding to breakdowns, diagnosing faults and repairing in a timely manner
- Implement, maintain and monitor/improve a PPM schedule for the assigned area plant and facilities.
- Planning and undertaking scheduled maintenance activities on plant and facilities.
- To create standard work and maintenance procedures
- To offer a professional, customer focussed approach to the maintenance of the plant
- To provide necessary and defined data for the natural work team board
- To offer a flexible approach to all requests for maintenance support and be actively part of the engineering team
- Consistently maintain and update all relevant documentation relating to maintenance activities in line with business audit requirements
- Reviewing of KPI data and undertaking role relevant corrective action(s)
- Maintenance of a safe working environment, keeping areas free from debris, ensuring housekeeping standards are at an acceptable level and recognising potential/actual hazards, taking corrective actions to minimise accidents
- Follow and promote company procedures relating to correct disposal of waste
- Support the generation and development of CI/EI actions that benefit the output of the function, health & safety and compliance to company standards

Vacancy – Maintenance Technician
